- Integration with Infrastructure Planning

A note about watershed coordination...

How would a symphony sound if each instrument was played without attention to timing or consideration of a collective musical piece?

...And how will your current and future water-resource management programs reach regulatory goals if planned without consideration of one another or other external factors? In order to be truly effective, water quality management must be programmatically integrated and must involve a variety of players and related health and land use issues. The most logical and meaningful approach to such management is to begin with the watershed, not the individualized program or regulatory requirement.

Goode & Associates provides many environmental services. But we feel that the true spirit behind the term "watershed coordination" is worth special consideration. You may hear of watershed efforts elsewhere in the state, but we offer a truly unique and comprehensive approach to resource management by considering the watershed as a regional management network for coordinating current, existing, and future plans and regulatory requirements. The end result is a more efficient and logical management strategy.

Goode & Associates will work with your staff, engineering consultants, and members of your community to develop integrated management solutions. Whether through this comprehensive management approach or as part of any of our services offered individually, we'll work to enhance your local programs and projects, meet or exceed regulatory requirements, and help complete your environmental management puzzle.

Corporate History

Goode & Associates, Inc. is a young company led by experienced, forward thinking professionals. Established in 1996 as Impact Analysis, Inc. the company changed its name to Goode & Associates in 1998 as we continued our evolution into a focused and insightful group of professionals in the fields of water quality, local government policy and management, inter-agency coordination, and technical assistance. Our principals maintain decades of combined experience in virtually every aspect of the fields of environmental management and government operations.

Some of our most recent clients include:

City of Indianapolis, Department of Public Works
City of Fort Wayne, Department of Utilities
Indianapolis Water Company
Upper White River Watershed Alliance, Inc.

Goode & Associates, Inc. considers integrity, respect, and dedication to our clients as important as the experience, knowledge, and creativity we offer.
